

# International Conference on Multidisciplinary Research & Practice (3ICMRP-2016)

---

*24<sup>th</sup> December 2016 at Ahmedabad Management Association, ATIRA Campus, IIM-A Road, Ahmedabad, Gujarat, India.*

**3<sup>rd</sup> International Conference on Multidisciplinary Research & Practice (3ICMRP-2016)** is a series of conferences focusing on the theory, technology and applications of Multidisciplinary Research. The first and second conferences were also conducted at AMA Ahmedabad in 2014 and 2015. 3ICMRP-2016 is the third in this series.

The main objective of this conference is to provide a platform for practitioners, academics, policy makers, researchers and students to share original research, reviews and industrial papers in various fields. The conference will aim to improve the culture of research and collaboration among scholars and researchers both regionally and internationally.

**Research and Scientific Innovation Society (RSIS International)** is the leading International Professional non-profit making Society that promotes the progress of research and innovation through International Conferences, Discussions, Seminars & to publish Professional International online journals, newsletters and to carry research and innovation at International level.

**Who we are:** We are a young, highly dynamic group started by a group of scientifically minded people highly passionate about global integration and wisdom sharing. Our organization is a result of our deeply held belief that the truly successful research results of tomorrow will be those that embrace the ever flattening scientific world. We support and conduct the collaborative interdisciplinary research in the new technology.

**Mission:** To provide a platform and an environment which shall foster research, exchange of innovative ideas amongst the researchers and academicians across the globe. It encapsulates the concept of interdisciplinary science that studies the societal and technological dimensions of knowledge evolution in digital society.

**Goals:** To complete this mission, Research and Scientific Innovation Society has set these goals:

- Bringing an objective, research-based, academic voice to the development and approval process of international research standards through its relationships with various international bodies.
- To promote scientific and educational activities towards the advancement of the Research and Scientific Innovation for the service of mankind and the advancement of general welfare.
- To Encourage and assist the professionals engaged in their respective fields to maintain the integrity and competence of the profession and Foster a sense of partnership amongst the professionals, engaged in same fields.
- To encourage regional and international communication and collaboration; promote professional interaction and lifelong learning; recognize outstanding contributions of individuals and organizations.
- Increase public engagement with science and technology and new developments.
